TRANSLATION JOURNAL SUBSCRIPTION INFORMATION

The eight Soviet physics journals which the American Institute of Physics translates appear about one half-year after the Russian originals. The volumes of the latter coincide approximately with the calendar year. But since some six months are needed for translation and printing, the January issues of the Russian originals do not appear in translation until the following July; the February originals do not appear in translation until August; and so forth.

All subscriptions begin with the first (July) translation issues and expire with the last (June) issues in the volume(s); subscriptions are accepted for complete volumes only. In the absence of specific instructions by the client, the Institute will consider all orders received through April 30 in any given year as applicable to the volume(s) published between the previous July and the following June. All issues in a current volume, published prior to receipt of a subscription order, will be furnished to the subscriber.

Brochures more fully describing each of the journals listed on the back cover will be supplied on request. Orders and inquiries should be addressed to the publisher:
